WIND  
PROSPECT

Working in Partnership. Delivering Capacity.

# WELCOME

*“Wind Prospect has constructed over 250MW of wind farm projects for EDF over more than a decade and are currently assisting us with over 250MW of future projects. They continue to maintain a professional approach and excellent attitude to the job with full ownership and responsibility being taken by the Project Managers. We would thoroughly recommend them as a quality partner in all aspects of wind farm development, construction, operations and consultancy.”*

**Christian Egal**  
**CEO, EDF Energy Renewables**

“Wind Prospect has successfully developed wind farm projects around the world. Our expertise acquired over two decades and distributed across 200 experts is available to aid you in finding, developing, building, operating, buying and selling your own renewable energy projects.”

**Euan Cameron**  
**CEO, Wind Prospect**

## DEVELOPMENT

- Developer services
- Site finding & feasibility studies
- Grid connection
- Wind resource
- Environmental assessment
- Planning & consenting

## PRE-CONSTRUCTION

- Health, safety and environment
- Turbine specification & tendering
- Electrical engineering design
- Civil engineering design
- Procurement & contracts management
- Consenting
- Grid connection management

## CONSTRUCTION

- Project management
- Owner's engineer
- Bank's engineer
- Health, safety and environment
- On-site monitoring
- Contractor liaison/management
- Programme & cost reporting
- Inspection & commissioning
- Commercial support

## OPERATION

- Monitoring & reporting
- Continuous monitoring & analysis
- Site management & technical analysis
- Full asset management
- Site optimisation & operations assessment

## ADVISORY

- Developer services
- Pre-construction
- Construction management
- Operations management
- Due diligence
- Consultancy
- Wind resource

## WIND

### ONSHORE

Our core business lies in onshore wind, and having built the UK's second wind farm in 1992 we bring our market leading experience to your renewable projects.

Our team of experts will complete your projects to the highest standards, in short lead times within tight budgets. We excel across the wind farm lifecycle and provide project owners, investors and lenders with the highest calibre of development, pre-construction, construction management, operations and advisory services.

### OFFSHORE

Wind Prospect has developed and advised on offshore projects around the world.

We developed Burbo Bank in the Irish Sea and the 200 MW Hong Kong Offshore wind farm, enabling us to bring hands on experience to any offshore project.

## ON-SITE RENEWABLES

Renewables Direct installs and operates on-site renewable energy schemes throughout the UK, supplying low cost, fixed price electricity direct to major energy users - with no capital cost to the client. Renewables Direct takes on all of the planning risk.

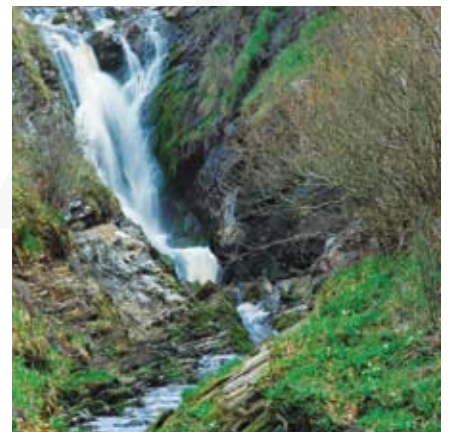

*Wind Direct* specialises in on-site wind energy schemes between 500 kW and 5 MW, whilst *Solar Power Direct* specialises in on-site rooftop solar energy schemes on premises with over 4,000m<sup>2</sup> of roof space.

## SOLAR

Solar Prospect provides a wide range of international services, from solar resource assessment through design to project realisation.

## HYDRO

Leveraging its extensive experience of consenting, constructing and operating onshore wind projects, Wind Prospect is increasingly active in the small hydro area, offering services throughout the project lifecycle.

*Wind Prospect has developed a track record and expertise in wind farm planning development and construction. It's a one stop shop where a client can choose from as little or as much help as he wants to make his project a success. Good advice and professional service are assured, and E.ON are pleased to recommend Wind Prospect to new and prospective clients."*

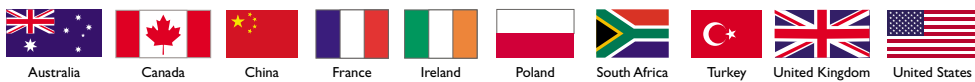

**Martin Roberts, E.ON**
