JOB VACANCY

Wind Farm/Data Analyst

Want to Work In the Renewable Energy Industry?

Wind Prospect Pty Ltd is part of a global windfarm development, construction and operations company. We are looking to recruit an energetic data analyst in our Adelaide office to work with its technical team to collect and process data from wind measurement masts and windfarms. The ideal candidate would be a recent graduate with a degree in mathematics and/or computing science. In depth understanding of statistical data techniques is desirable. The candidate would be comfortable both in the office and out in the field working with instrumentation and communication systems. They would also be self motivated and able to work with little supervision.

Responsibilities would include management and maintenance of the data collection systems, analyzing and processing of data and the development of tools, including both the development of mathematical analytical processes and associated programming to create the tools.

Please send all CV's to:
